

WYO-BEN[®]

Same Big Performance.
New Smaller Size.

CLAYMASTER®

Clay Inhibitor

**USE WITH POLYMER
OR BENTONITE
VISCOSIFYING
SYSTEMS.**

- Keeps clay cuttings from sticking
- Reduces swelling of the bore
- Reduces rotation/pullback pressures

WYO-LUBE™ RR

Drilling Fluid Lubricant

**USE IN HDD ROTARY
DRILLING AND MINING
INDUSTRIES.**

- Reduces drag and torque
- Increases penetration rates
- Protects drill rods and tooling

WYO-VIS® HP

Clay Inhibitor and Viscosifier

**USE IN CLAY AND
SHALE FORMATIONS.**

- Builds viscosity fast
- Reduces torque
- Shields swelling clays
- Prevents bit balling

DRILL-X™ HP

Drilling Detergent And Wetting Agent

**USE IN FRESH-WATER
DRILLING FLUID
SYSTEMS WHERE
CLAYS ARE PRESENT.**

- Keeps tooling clean
- Enhances system lubrication
- Lowers fluid viscosity
- Makes clays more flowable, prevents sticking

Same Big Performance. New Smaller Size.

Our proven Wyo-Ben® **CLAYMASTER®**, **DRILL-X™ HP**, **WYO-VIS® HP**, and **WYO-LUBE™ RR** are now available in small, easy-to-handle, 64-oz pouches. Perfect for smaller bores, the new no-mess packaging makes mixing easy and minimizes waste. But while the packaging is new, the products are the same tried-and-true Wyo-Ben solutions trusted for years on the largest bores. These quick-mixing, field-proven fluids make every bore more effective and efficient, protecting your equipment and boosting your productivity. And since quality Wyo-Ben products are highly concentrated, you can always do more with less, saving you money in the long-run. Get the proven Wyo-Ben performance you need ... now in a smaller, easier to handle package!
